ABSTRACT

This project “*Gym Management System*” is a solution to fitness centre's to manage the customers in an easier and more convenient way. The administrator, is able to view all the members of fitness centre as well as their details. The basic structure of the system as follows. This project is a web application and it manages the gym members, the personnel and the inventory. This system also maintains the client details, to provide the valuable reports regarding the progress of the gym member.

Admin will be the one and only controller of this software. Previous methods like registers for various activities such as storing and searching data is replace by this software. Accounting can be more easy.
